REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Upon the amendment of July 17, 2007 the claimed invention is a highly sulfonated a thermoplastic A-block and B-block polyisobutylene, wherein a sulfonation level in A-block is over 70 mol percent and wherein the claimed sulfonation level is a benefit to a higher ion exchange capacity of the resulting compound.
2. While the closest reference of record to Tan et al '6,579,948 discloses a sulfonated block copolymer comprising poly(styrene-co-styrene sulfonic acid) segments and polyisobutylene segment, the sulfonation level of polystyrene is in the range from 1 to 70 mole %.
3. Upon reviewing evidence of record together with the Applicants' remarks of July 17, 2007 it was found that the present claims 1-2, 5-12 and 14-20 are allowable over Tan invention. There is no motivation to combine the teaching of Tan with other references of record to Storey et al Patent 5,039,752 or Murata et al Patent 3,553,286, since none discloses a sulfonation level of over 70 mole % of the polystyrene block and a high ion exchange capacity of the resulting compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
